Political activist group and electronic outfit **Ultra-red** (www.ultrared.org) have announced that they've turned themselves into an organisation, complete with a board of directors, trustees and collaborators. By mimicking the structure of large bureaucratic organisations, they feel UR can act as a more active hub. One step taken as an organisation is to set up an archive. **Public Record** (www.publicrec.org) is the activist organisation's public archive, to be filled with MP3s and documentation. With one new release uploaded on the first of every month. Ultra-red's "Articles Of Incorporation", featuring 40 soundscapes, each one minute in length and excerpted from previously unheard tapes recorded over ten years of Ultra-red activity, is currently available for mass download.
